

**International Symposium
and Seminar on
the Present Situation of
Environment in the Angkor
Monument Park and Its Environs,
Cambodia**

INTRODUCTION

The International Symposium on "the Present Situation of Environment in the Angkor Monument Park and its Environs, Cambodia" will be held on the 17th of March, 2009 at the UNESCO/JASA Central Hall in Siem Reap, and the related Research Seminar will be opened on the 18th of March, 2009 in the Seminar Room of Institute of Technology, Cambodia (ITC) in Phnom Penh.

OBJECTIVE

The aims of the symposium and seminar are first to open the results of the International Research Mission as the Team ERDAC (Environment Research Development in Angkor, Cambodia: 2006-2009) supported financially by the Japan Society for the Promotion of Science (JSPS) and established to evaluate of the Present critical situation of the environmental pollution and destruction of the Angkor Monument Park and its environs in Cambodia from various points of scientific view such as atmospheric, water, and forest environments, and second to exchange the information regarding to the environmental pollution and destruction among the participants of the symposium and seminar. In order to promote a vast participation and a better understanding on the present environment of the monument park, everybody who are interested or have involved in

the study of the environment are welcome to the symposium and seminar.

ABSTRACT SUBMISSION

The Organising Committee would like to request the participants who wish to present their papers in the symposium in Siem Reap to send the abstracts of their papers to the symposium secretariat. The abstract should include:

- The title of the paper.
- The name, affiliation, mailing address, telephone number and email address of the author(s).
- Sufficient details of the paper not exceeding 800 words.

Abstract should be sent to the symposium secretariat by the 5th of March, 2009.

English will be the official language of the symposium and seminar

CALL FOR PAPERS

Abstracts are due to by the 5th of March, 2009. Invited and contributed papers will be published in the proceedings of the symposium.

TECHNICAL SESSIONS

Atmospheric Environment

Water Environment

River Engineering

Soil Engineering

Hydrology

Freshwater Biodiversity

Forest Environment

Recent Topics from Lake Tonle Sap

REGISTRATION FEE

Free

Team ERDAC (Environment Research Development in Angkor, Cambodia)

The team ERDAC was first established in March 2006 as a Japanese researchers team and was reorganised in June 2006 as an international cooperative mission with the APSARA Authority. The team aims for evaluation of the present situation of the environmental pollution and destruction in and around the Angkor monument area and to propose their improvement plans.
